EXPERIENCE

Adfinis AG - Cloud Native team - System Engineer

📅 Jan. 2024 – Present 📍 Switzerland

- Deliver cloud-native infrastructure and DevOps solutions for enterprise clients.
- Architect and operate Kubernetes and OpenShift platforms across multi-cloud environments (AWS, Azure, GCP).
- Design and implement enterprise GitLab platforms and CI/CD architectures integrated with GitOps workflows (ArgoCD) and Vault.
- Lead upgrades of 30+ production systems (Kubernetes, OpenShift, GitLab, Vault), including cluster upgrades, platform components and security patching.
- Automate infrastructure provisioning and configuration using Terraform and Ansible to standardize and scale customer environments.
- Troubleshoot distributed systems, support incident resolution, and improve platform reliability and operational performance.

CERN - Cloud Infrastructure team - Cloud Infrastructure Engineer

📅 Sept. 2021 – Sept. 2023 📍 Switzerland

- Played a key role in configuring, managing, and continuously improving CERN's Cloud Service infrastructure (OpenStack).
- Carried out service upgrades which implied the migration of thousands of VMs.
- Developed automation tools to streamline operations and increase efficiency.
- Responsible for monitoring the Cloud Service, ensuring high availability and performance through proactive monitoring.
- Managed and maintained the CERN OpenStack web application, ensuring its availability and performance for thousands of users.
- Provided support and incident resolution as part of the Cloud Service Support team, managing a large-scale infrastructure with 10,000 physical servers, 13,000 VMs, and 500,000+ cores serving thousands of users.

CERN - Databases Group - DevOps/Infrastructure Engineer

📅 July 2018 – July 2021 📍 Switzerland

- Designed and implemented a containerized infrastructure using HashiCorp Nomad, leading the migration of multiple systems to Nomad and Kubernetes.
- Led the migration of monitoring and alerting systems to a new solution.
- Improved infrastructure automation and configuration management with Puppet and Ansible.

"DevOps / Site Reliability Engineer with 7+ years of experience designing and operating cloud-native platforms and Kubernetes infrastructure."

Enthusiast, optimistic and efficient team player. Always willing to learn, contribute and help solve problems to achieve the best results"

LANGUAGES

Spanish
English
French
Portuguese

SKILLS

- **Cloud:** AWS, Azure, GCP, OpenStack
- **Containers:** Kubernetes, OpenShift, Docker, Nomad
- **IaC:** Terraform, Ansible, Puppet
- **CI/CD:** GitLab CI, GitHub Actions
- **Observability:** Prometheus, Grafana, ELK
- **Security:** HashiCorp Vault
- **Languages:** Python, Bash
- **Systems:** Linux

CERTIFICATIONS

- **Kubernetes:** CKA (Certified Kubernetes Administrator), LFS258
- **HashiCorp:** Vault Operations Professional, Vault Associate (002)
- **GitLab:** Certified Professional Services Engineer (including Implementation, Migration, Security, CI/CD, Git, Project Management)

EDUCATION

B.S. in Computer Engineering
University of Vigo

📅 2020 📍 Spain

Erasmus Programme. Computer Engineering

Bialystok University of Technology

📅 2016 📍 Poland
